

## The European Harm Reduction Network

The *EuroHRN* project (European Harm Reduction Network) is co-funded by the [Drug Prevention and Information Programme](#). The project partners are international harm reduction networks and national umbrellas: [IHRA](#), [Correlation Network](#), [AFR](#), [EHRN](#), Romanian Harm Reduction Network, [INPUD](#), [ASUD](#), etc.

The overall aims of this project are to expand the knowledge base, raise awareness of drug-related harms, and promote and support public health and human rights orientated responses to drug use across Europe, through a two-year project which will support the development of a transnational harm reduction network for Europe. This network will integrate the [International Harm Reduction Association](#) (IHRA).

The network will be launched at the time of the IHRA 21<sup>st</sup> International Conference 25-29, 2010 in Liverpool, England.
